

COMMISSIONER OLSON PROPOSED AMENDMENT NO. 4

DATE PREPARED: May 3, 2021

COMPANY: Energy Rules

DOCKET NO.: RU-00000A-18-0284

AGENDA ITEM NO. 23

OPEN MEETING DATE: May 4, 2021

Purpose: This amendment changes the various mandates under R14-2-2704(B) into goals. An Electric Utility's Clean Energy Implementation Plan shall report on how the Electric Utility will seek to achieve the goals.

Changes are to Exhibit A in the Recommended Opinion and Order docketed April 19, 2021

At Page 3217, DELETE R14-2-2704 (A) and (B)

INSERT

A. An Electric Utility shall by April 1 every third year, beginning April 1, 2023 to file with the Commission, for Approval, a Clean Energy Implementation Plan.

B. An Electric Utility's Clean Energy Implementation Plan shall report on how the Electric Utility will seek to achieve the following goals:

1. By January 1, 2030, a resource portfolio with a Demand-Side Resource Capacity equal to at least 35% of the Load Serving Entity's 2020 peak demand;
2. For each three-year planning period, Utilities shall propose DSM programs that include traditional Energy Efficiency, Demand Response, and other programs that focus on reducing overall energy usage, peak demand management, and load shifting, in accordance with the following:
 - a. Utility performance shall be based on both megawatt-hour energy savings and megawatt Capacity reductions;
 - b. Utilities should seek to achieve on average at least 1.3% annual Energy Efficiency measured by megawatt-hour savings over the three-year planning period, without carrying over energy savings credits from programs implemented before January 1, 2021;
 - c. The portfolio of DSM measures should include rate-enabled, load-shifting technologies, including Demand Response, that provide Customer bill savings and clean energy benefits; and
 - d. Utilities shall propose programs and expected peak load reductions in their filings for review and Approval by the Commission;

COMPANY: Energy Rules

DOCKET NO.: RU-00000A-18-0284

AGENDA ITEM NO. 23

OPEN MEETING DATE: May 4, 2021

3. By December 31, 2035, the installation of Energy Storage Systems with an aggregate Capacity equal to at least 5% of the Electric Utility's 2020 peak demand, of which at least 40% shall be derived from Customer-owned or Customer-leased Distributed Storage; and
4. A 100% reduction in Carbon Emissions below its Baseline Carbon Emissions Level with the following corresponding interim goals:

<u>Year</u>	<u>Reduction from Baseline Carbon Emissions Level</u>
January 1, 2032	At least 50%
January 1, 2040	At least 75%
January 1, 2050	100%
