• PSYCHOLOGY
• NUTRITION/DIETETICS
The fourth annual Pediatric Obesity Symposium hosted by the Cardiometabolic Assessment Research and Education (CARE) Program at Phoenix Children’s Hospital will be held at the Scottsdale Resort and Conference Center in Scottsdale, Arizona. The symposium offers healthcare providers an opportunity to learn from local and national experts in the area of pediatric obesity and obesity-associated conditions. The goal is to enhance the knowledge base of healthcare providers in order for them to improve the health and lives of children and families affected by obesity.

Cost: $25 (lunch provided)

To Register Online:
www.phoenixchildrens.org/caresymposium or
Fax: (602) 933-0610 or

1:15 - 1:20 p.m. Welcome
1:20 - 2 p.m. Pediatric Obesity and Psychosocial Health: Severity of Weight or Severity of Burden? - Meg Zeller, PhD

Learning Objectives:
• Provide an overview of psychosocial correlates of child and adolescent obesity
• Highlight growing evidence supporting a greater psychosocial impact with higher degree of excess weight
• Consider alternate evidence pointing towards a broader conceptualization of disease burden
• Discuss implications for clinical care

2 - 2:40 p.m. When Lifestyle Modification Therapy is Not Enough: Pharmacotherapy for Severe/Complicated Obesity in Pediatrics - Claudia Fox, MD, MPH

Learning Objectives:
• Describe the prevalence, trends, and co-morbidities associated with severe obesity in pediatrics
• Identify the biological underpinnings of obesity which may serve as pharmacological targets for treatment
• Detail a rationale for using pharmacotherapy for severe obesity in pediatrics
• Describe FDA approved medications for adult obesity and the pipeline for pediatric obesity

2:40 - 2:55 p.m. Break

2:55 - 4 p.m. Universal Lipid Screening in Children: Pros and Cons Panel Presentation and Discussion - Micah Olson, MD and Damon Dixon, MD

Learning Objectives:
• Be familiar with arguments for and against universal lipid screening in children.
• Describe the rationale for identifying and treating pediatric patients with dyslipidemia.
• Know the current recommendations for lifestyle modifications and pharmacological treatment for patients with dyslipidemia.

4 - 4:15 p.m. Final Q&A, Closing and Adjourn
